1. Claims 1-20 are allowed.

Independent claims 1 and 11 recite "... inserting each group of pictures into the constant bit rate packetized transport stream when the number of bits for said group of pictures is less than or equal to the number of available bits for said group of pictures; and transrating each group of pictures when the number of bits in said group of pictures is greater than the number of available bits for said group of pictures so that the total number of bits in the groups or pictures is less than or equal to the total number of available bits..." which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 2-10, 12-20 are allowed for the reasons concerning the independent claims.
